

A cordless hydraulic wheel lift device, the PowerLift, is shown in a workshop setting. The device has a black frame with orange accents and is mounted on four casters. It is designed for lifting and lowering vehicle wheels. In the background, a car is visible on a lift, and various workshop tools and equipment are scattered around.

POWERLIFT

ARTICLE NO. 200.104.000

The PowerLift enables fast and back-friendly wheel changes for wheels weighing up to 60 kg. High lifting and lowering speeds, along with ball-bearing rollers and fine-tuning, ensure precise and comfortable mounting. Thanks to two 18-V Makita rechargeable batteries, the mobile PowerLift offers flexible, cordless operation.

- **FOR WHEELS WEIGHING UP TO 60 KG**
- **FAST AND BACK-FRIENDLY WHEEL CHANGES**
- **CORDLESS OPERATION WITH TWO 18-V MAKITA RECHARGEABLE BATTERIES**
